# Agenda

## We are covering below topics

- Generation of process and task forms
- View processes as PDF and PNG
- Viewing process BPMN2 source
- Visual Process Validation
- Generating code to share process image, PDF & embedded process editor
- Importing existing BPMN2 processes
- Viewing Process Information
- Support for Domain-specific service nodes
- Configuring Designer
- Embedding designer in your own application
- Integration with the jBPM Service Repository
- Requirements

# Generation of process and Task Forms

# View processes as PDF and PNG

# Viewing process BPMN2 source

# Visual Process Validation

Generating code to share process image,  
PDF & embedded process editor

# Importing existing BPMN2 processes

# Viewing Process Information

# Support for Domain-specific service nodes

# Configuring Designer

# Embedding designer in your own application

# Integration with the jBPM Service Repository

# Requirements

# Quiz

Desginer

allows you to set both process and shape properties.

- a) Toolbar
- b) Object Library Panel
- c) Properties Panel
- d) View Tabs

**\_\_\_\_\_ allows you to set both process and shape properties.**

- a) Toolbar
- b) Object Library Panel
- c) Properties Panel**
- d) View Tabs

**Designer is a graphical web-based BPMN2 editor**

- a) True
- b) False

**Designer is a graphical web-based BPMN2 editor**

a) True

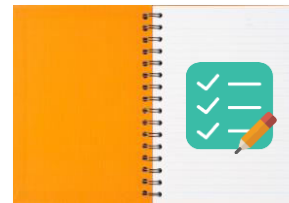

b) False

# Conclusion

## In this session, you have learnt:

- Generation of process and task forms
- View processes as PDF and PNG
- Viewing process BPMN2 source
- Visual Process Validation
- Generating code to share process image, PDF & embedded process editor
- Importing existing BPMN2 processes
- Viewing Process Information
- Support for Domain-specific service nodes
- Configuring Designer
- Embedding designer in your own application
- Integration with the jBPM Service Repository
- Requirements

# Hands-On

Practical

- Create jBPM Project using designer and see all the Properties of Designer.
- Connect to Service repository and custom WorkItem handler.
